Summary

These are low profile rail slot covers for the Voron 2020 rails.

3D Printers > 3D Printers - Upgrades

These are low profile 2020 slot covers. They maximize the amount of space left inside the slot for wire routing. Print flat side down.

I included a .stp file, so you can change the model to create custom lengths. I have included .stl files in 25mm increments, up to 200mm.

Model files

slot-cover-55mm.stl

voron-slot-cover-25mm.stl

voron-slot-cover-50mm.stl

slot-cover-83mm.stl

slot-cover-59mm.stl
